

Proposal Topic Examples Suggested by SME and other Members in the Society

Clinical

- Military Suicide Prevention and the Assessment and Treatment of Suicidal Risk
- Neuropsychology in the Military
- Resilience in the Military Community
- A Functional Approach to Conceptualizing Cases of PTSD with Comorbid Problems
- Working with Service Members Who Are Transitioning to the Civilian Work Force
- Where are we with Sexual Assault and Harassment in the Military?
- Charting the course: challenges and success stories for women in the military
- Roles of women in the military and what we can do as psychologists
- Resiliency and Forensics in the Military
- Practical techniques for managing large caseloads (keeping good access to follow-up care)
- State of the art in detection/assessment of deception
- DoD open service policy for transgender SMs: The history, implementation, and proposed new version of the original past policy
- How to get started in the academic career field
- How to work as a leader-clinician psychologist
- Suicide in the Military
- Moral Injury and its impact on the military
- Clinical Practices and guidelines for veterans
- Cognitive Remediation in Military TBI
- Management of Concussion in Service Members
- A functional approach to Conceptualizing Cases of mental health disorders in a military setting
- Ethical concerns when working with service members
- Creating support during transition to civilian life
- How do we care for families in order to care for service members?
- Developing Couples Resilience
- Application of Mindfulness in the Military
- Psychological Assessment in the field of Military Psychology
- Complementary/Alternative Treatments with Veteran/Military Populations
- Completing Mental Health Compensation and Pension Psychological Evaluations
- Fostering Post-traumatic Growth in Clinical Work with Veterans, Service members and their families

I/O, Leadership, Coaching

- Military leadership
- Employee motivation for accomplishing tasks under difficult conditions
- Organizational stress and occupational health psychology
- Team resilience under stressful situations

- Team adaptation and performance
- Leadership under difficult conditions
- Organizational citizenship behaviors in the military
- Counterproductive work behaviors in the military
- Organizational justice in the military
- What skills are needed to develop an organizational career practice
- Shiftwork and implications for performance
- Morale and job stress
- How to get employees engaged - what drives engagement in the military
- How to best conduct organizational change in the military
- What are some of the non-traditional barriers in the military versus industry?
- Working with Service Members Who Are Transitioning to the Civilian Work Force
- Transitioning from student leader to professional leader
- Team building and management as an ECP
- Gaining respect as a young leader
- Team motivational techniques under stressful circumstances
- Organizational stress and occupational health psychology
- Coaching and Developing High Potential Leaders
- Developing Well-being in the Workplace

Operational

- Talent management in SOF
- Executive Coaching in SOF
- SOF Selection
- Role of hardiness in performance
- Advancements in Personnel Selection- predictive models and legal issues
- The value of psychology's contribution to Assessment and Selection programs
- The value of command consultation - helping commands be more effective (and/or handle difficult situations)
- The value of SERE psychologist support to repatriation activities
- The value of BSCT to Interrogation teams
- Ethical issues in working with SOF personnel when embedded within operational units
- Advancements in Personnel Selection- predictive models, legal and ethical issues
- Managing multiple relationships and limits on confidentiality
- Assessment and Selection - the process, how it differs from clinical evaluations, ethical considerations, and common pitfalls
- Training opportunities at the undergraduate/graduate level that may correlate well with operational psychology
- Role of testing in operational psychology
- Role of resilience and clinical intervention in operational psychology
- Learning to adapt traditional therapy to this setting
- What are the conversations and differences between our Society and the APA and what does that mean for those practicing in the operational, research, I/O and clinical fields?

Research/Human Factors

- Pre-deployment screening
- Finding high potentials among new recruits
- Prevention around PTSD
- Non-cognitive measures in military testing
- Leadership Measurement and Development
- New approaches to PTSD
- Improved training techniques
- Social issues in the military
- Improved testing technologies
- Talent Management
- Pre-deployment screening
- Human performance optimization
- Novel approaches to recruiting and selection for the next generation of service members in areas such as drone or cyber operators and world aware soldiers (e.g. simultaneous strategic and tactical mission capabilities)
- Technology shaping force competencies in areas such as cyber tools, robotics, autonomy, machine learning
- How technology shapes the future warfighters?
- Selection and assessment in the military
- Human-machine trust
